

Corporate OVERVIEW

Sheridan Institute of Technology and Advanced Learning

The Sheridan Institute of Technology and Advanced Learning is one of Canada's premier polytechnic institutes and is dedicated to exceptional applied learning and graduate success. We are a leader in providing skills-based educational programming that integrates theory with application, preparing students for careers in a wide range of disciplines. Sheridan serves close to 15,000 full-time students annually at our campuses in Oakville and Brampton, Ontario.

RELEVANT APPLIED LEARNING

Whether you come to us straight from high school, or whether you've already attended university or college, you'll choose Sheridan for the programs that make you job-ready and on track for a successful career. Many of our programs include a co-op option or field placement/internship component that enables you to gain valuable work experience while applying your classroom learning in the field. From one-year certificates to four-year degrees, you will find a program at Sheridan that's right for you.

SCOPE AND DEPTH

Our students choose Sheridan for the wide variety of career paths available to them. Our expertise spans the arts, technology, business, health and community services. Sheridan's world-famous animation, arts and design school is one of the largest in the world. We offer award-winning business programs, sophisticated technology and applied computing programs, and innovative community, wellness and public safety studies.

Sheridan's academic programs remain innovative, relevant and current through close consultation with and the involvement of our program advisory committees. These are made up of business, industry and community representatives who know firsthand what skills and training are required to succeed in today's rapidly changing world.

Program options include a wide range of programs and credentials including pre-apprenticeship and apprenticeship training, one-year certificate and graduate certificates, two- and three-year diplomas, and Bachelor's degrees in applied areas of study. We also offer a number of collaborative degree programs through partnerships with the University of Toronto at Mississauga, York University and Brock University.

Some of our students enjoy enhanced applied learning opportunities through involvement in applied research. Through innovative partnerships with the public and private sectors, we have launched several unique training and research centres: the Visualization Design Institute, Sheridan Elder Research Centre, Centre for Advanced Manufacturing and Design Technologies, and High/Scope Teacher Education Centre.

RELATIONSHIPS

Sheridan is proud to be home to some of the most outstanding faculty Canada has to offer, and it's our faculty above all else who make our student experience so exceptional. Our faculty are experts in their respective fields, many of them working day-to-day in their professions to further enhance the learning experience through real-world examples brought into the classroom. It's this direct connection to outstanding teachers and their practical knowledge that makes a Sheridan education so valuable.

Another way students benefit from our faculty is through their approachability and genuine interest in helping students succeed. Sheridan's programs and classes are designed to provide time for students to interact with their instructors and for instructors to know their students. In fact, our graduates will tell you that the close connection that develops between students and faculty is one of Sheridan's greatest strengths.

CAREER READINESS

One of the primary reasons that so many people choose Sheridan is to enhance their career prospects. Close to 90 per cent of Sheridan graduates typically find employment within a few months of leaving school, while over 92 per cent of employers surveyed express satisfaction with the quality of Sheridan graduates.

Not only do our graduates have the benefit of practical learning from expert faculty, many of whom work in the field in addition to teaching, but they also benefit from outstanding co-op opportunities and a career centre with strong links to business and community organizations. When you graduate from Sheridan, you're ready to take on your new career.

CONNECTIVITY

Sheridan has one of the largest and most advanced mobile computing programs in Canada. Over 5,000 students benefit from the integration of laptop computers in their learning experience, both in and outside of the classroom.
